

<p>1</p>		<p>When screen sharing, press the arrow option to the right of the screen share menu.</p>
<p>2</p>		<p>This will show the expanded options. Select Movie Mode</p>
<p>3</p>		<p>Alternatively, you can access this option from the Vivi App while sharing, via the menu at the bottom of the screen. Select the Film Icon</p>

IMPORTANT INFO ABOUT MOVIE MODE

Movie mode will add a buffer (delay) to your stream. This will improve the stream quality and reduce any buffers / skips; however, this means it will take longer for any actions you perform on your device to show on the screen.

Movie mode can be turned off by the same process as turning it on.
